

Nature Study Volume 4

Filesize: 4.12 MB

Reviews

This pdf is indeed gripping and interesting. It is definitely simplistic but shocks within the 50 percent of your book. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Michael Spinka)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1904 edition. Excerpt: . . . of all, while the more costly works, with elaborate colored plates, should be in every public library. Where it is possible, visits should be made to a museum and a happy hour passed in the study of the collection. Where there is no museum near at hand, parents, teachers, school authorities, library trustees and all interested in the development of children should unite in the work of forming one, the beginnings of which may be placed in the school-room or in the library. In a lesson like the present it is impossible to mention even by name the many family groups of an order whose representatives are legion. Their larvae, or caterpillars, are everywhere and feed upon every growing thing. Every plant has one or more enemies among the countless host. Some feed upon the leaves, some live within the fruit, a few bore into the solid wood, many live in the stalks of grasses, and one even feeds under water in the stems of water-lilies; and each kind of caterpillar changes at length into its own particular species of moth or butterfly. So a lifetime is not long enough in which to learn about them all, but there are certain groups that are so distinct or so common that they can be easily recognized, even by the children, with a little assistance, and these may form the beginnings of a collection. For example, the Promethea moth is the most common of the Giant...
