They are designed such that the reader has a multi-dimensional approach to processing them. The reader also employs a multi-sensory approach (using technology), to strengthen processing skills, namely, Listening Skills, Visualization Skills, Paying attention to detail, and making connections. The reader must VISUALIZE, and boost the innate perception skills displayed by infants and very young children. We recommend that one works with a partner. Working with a parent helps bridge the generation gap while working with a peer helps the reader perceive the multi-conceptual nature of words. Each may be correct even though they give very different answers. Research skills will be developed in the event of any disagreement. These skills may be used in a social, educational, or industrial environment. These skills are the foundation for better preparing our students for higher education, or the work force. Recently, there has been many clarion calls for better preparation of students. This is just one of the many responses. Here, each player will have a vastly personal experience which should produce both a sense of achievement and a sense of humility. Both of these innate, involuntary, responses opens the door of opportunity for higher achievement. These attitudes, too, help them prepare for the real world.
