Box 6015, Gaithersburg 20884-6015) : The Office distributor, 1992 OCLC Number: (OCoLC)27970453 Subject: Multivariate analysis. Excerpt: . . . Chapter 1 Introduction workable tools and methods have been developed and perfected. Trained evaluators use these tools as appropriate in addressing an assignments objectives. This paper tries to reinforce the uses of these tools 3 and put consistent labels on them. It also gives helpful hints and illustrates the use of each tool. In the next section, we discuss the basic terminology that is used in later chapters. Observations about persons, things, and events are Attributes, central to answering questions about government Variables, and programs and policies. Groups of observations are called data, which may be qualitative or quantitative. Cases Statistical analysis is the manipulation, summarization, and interpretation of quantitative data. We observe characteristics of the entities we are studying. For example, we observe that a person is female and we refer to that characteristic as an attribute of the person. A logical collection of attributes is called a variable; in this instance, the...
