Bulletin of the Imperial Institute Volume 6

By Imperial Institute

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 edition. Excerpt: . apparently a sapwood tree. It is rather ornamental, but has no value for export. It should be a useful wood in the Protectorate. It will not take nails, being fissile; is hard to saw, but planes fairly easily and smoothly. It turns very well, and takes a good polish. Weight per cubic foot, 64 lb. No. 441. Pterygota sp. A very coarse, inferior wood of dirty-white colour. The specimen was too small for proper tests, but it is evident that the wood has little value. Weight per cubic foot, 43J lb. No. 456. Voacanga oblusa. K. Schum. A reddish-brown wood of fine and open grain; apparently a sapwood tree. It is not ornamental, and is of no value for export, but may be useful for construction. It takes nails rather well, though it is somewhat fissile. It is tough and hard to saw; planes...

Reviews

It is an awesome publication which i actually have ever read through. it had been writtern really properly and valuable. I found out this book from my i and dad recommended this pdf to discover.

-- **Doyle Schmeler**

This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that i am sure that i will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.
